SOFTWARE

Nmadu J (2022). *_Dyn4cast: Dynamic Modelling and Machine Learning Environment_*. R package version 11.11.1.9000, <https://github.com/JobNmadu/Dyn4cast>. See my blog posts at <https://www.jobnmadu.com/categories/r/> for information on the use of the package.

The ***Dyn4cast*** package is designed to be a lightweight package, with the aim of simplifying the estimation of timeseries and cross-sectional data as well as prediction and forecast of time-varying datasets. The philosophy behind all the functions in this package is *one line of codes*.
